

Cisco Services for Hybrid Cloud Platform for Google Cloud

Accelerate cloud implementation with new Services

85% of cloud adopters use multiple clouds*

Fast application innovation and implementation is a key differentiator

Leveraging the **right expertise** and **best practices** speeds app time-to-market

However, IT challenges impede quick adoption:

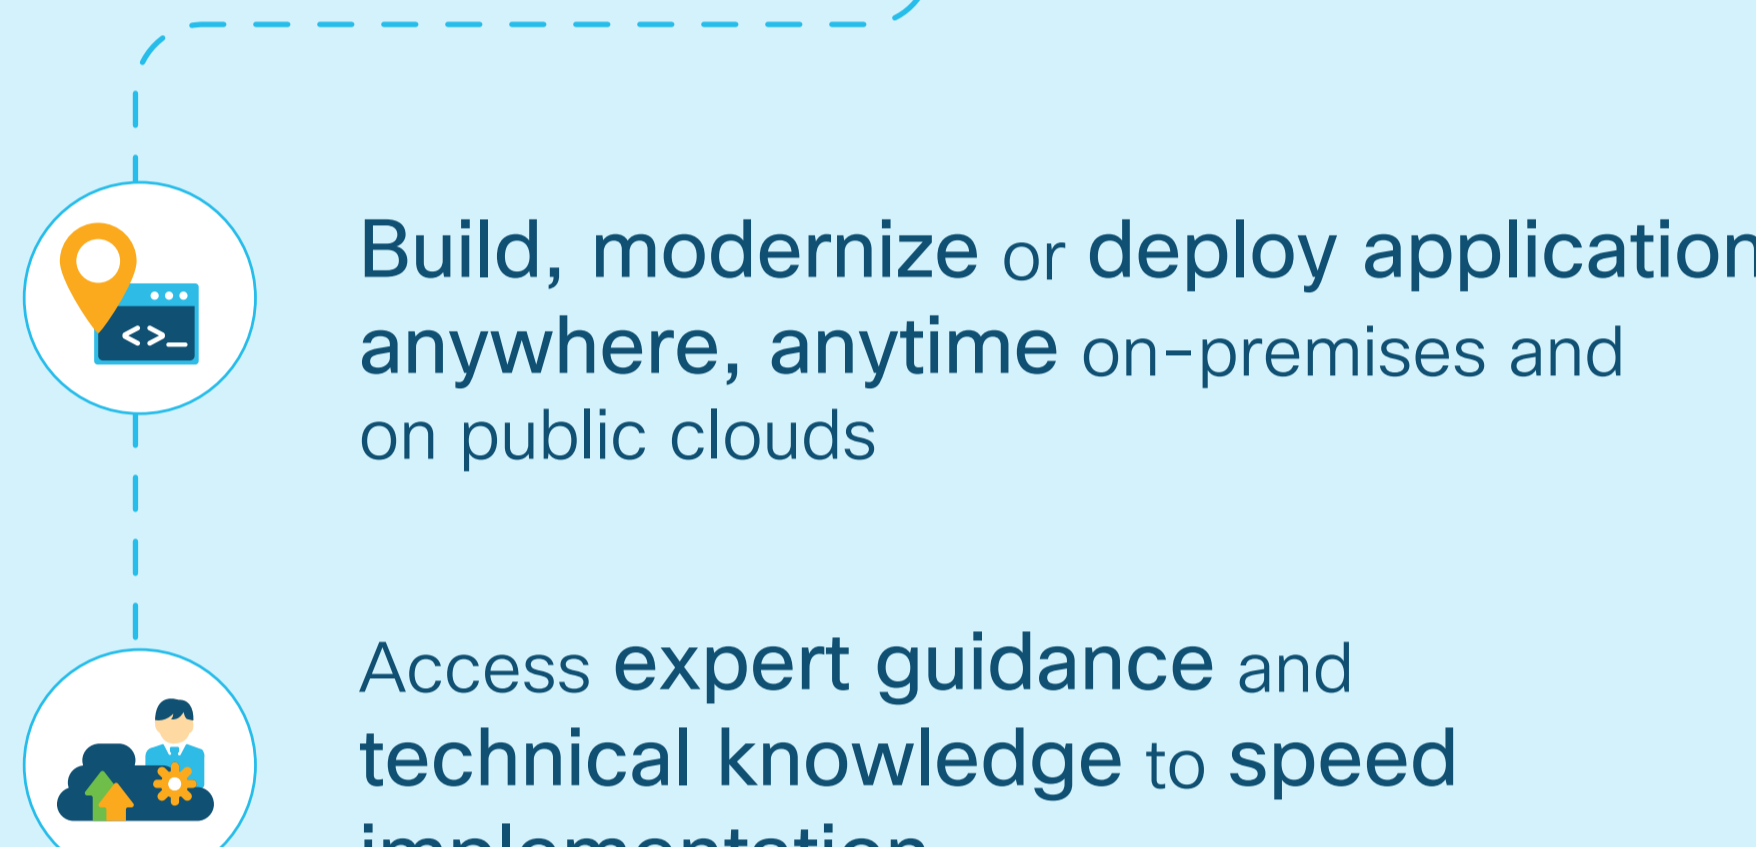

Disparate technologies increase complexity and cost

Limited IT freedom and flexibility hinders application development

Limited expertise and knowledge impacts deployment cycles

Multiple cloud networks increase security concerns

Customers need to be empowered to

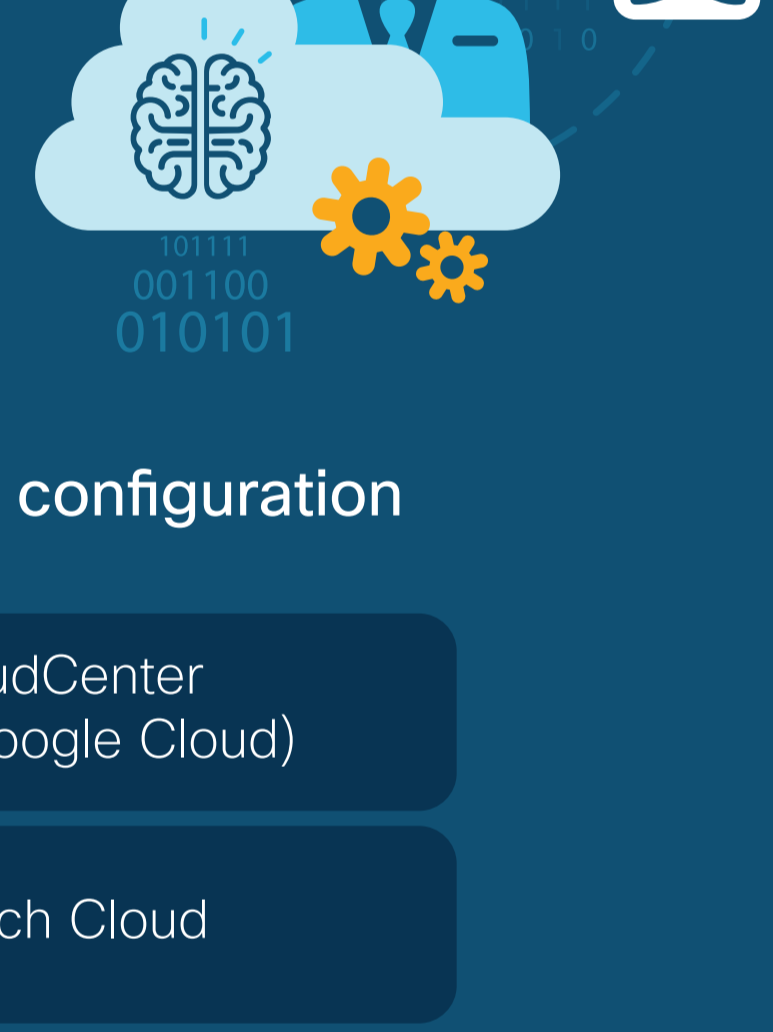

Build, modernize or deploy applications anywhere, anytime on-premises and on public clouds

Access expert guidance and technical knowledge to speed implementation

Leverage technical support to accelerate cloud adoption and IT investment

Engage the experts with Cisco Services

Cisco Quick Start Services implement the base solution *plus* one customer-selected use case:

Base Offer set-up and configuration

- Cisco CloudCenter (VMware or Google Cloud)
- Stealthwatch Cloud
- VPN (Cisco or Google)
- Cisco Hyperflex
- Cisco Container Platform
- Services and customer chosen sample applications (2)

Use Cases

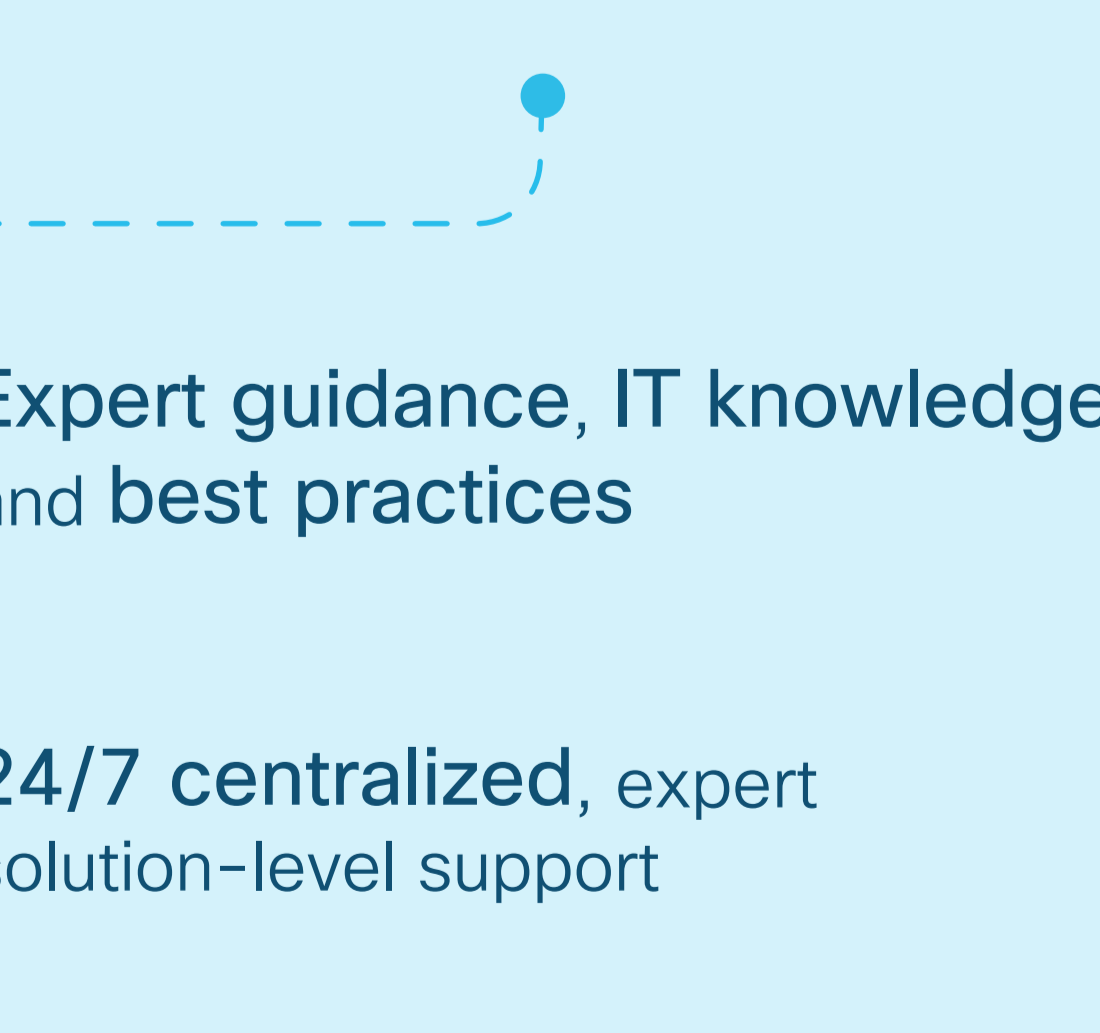

- Develop in Public Cloud; Consume On-Premises:** Apigee setup and configuration
- or
- Develop On-Premises; Consume in Public Cloud:** Open Service Broker and Google Catalog Service configuration
- or
- Seamless CI/ CD App:** Gitlab & Artifactory setup & configuration, and Jenkins CC Plugin add & configuration

Lifecycle of Custom Services are tailored to meet customer needs:

Strategy and Assessment Services + Use Cases

Leverage the best-of-the-breed

Expert guidance, IT knowledge and best practices

24/7 centralized, expert solution-level support

Cloud proficiency across networking, security, management and analytic

Accelerate Hybrid Cloud adoption through strategy and advise

Enhance Application Agility and Operational Excellence using expert guidance
